

## **Abstract of th Disclosur**

### **Selecting Functions Via A Graphical Us r Interface**

Apparatus for processing image data is provided, comprising  
5 processing means, storage means, display means and stylus-like manually  
operable input means, wherein said processing means is configured to  
perform functions upon image data in response to an operator manually  
selecting a function from a function menu; said processing means responds  
to a first user-generated input command so as to display a plurality of  
10 function gates at a cursor position; movement of the stylus-like manually  
operable input means so as to move said cursor through one of said function  
gates results in a related menu being displayed; and manual selection of a  
function from said displayed menu results in the selected function being  
performed upon said image data.
